

Power **Failure** in CNC Machines?

Causing: Tool Breakage, Production Loss and Job Rejection

Install **ACCUSTOP** Axis Drop Preventer today!

Suitable for all types of CNC & Grinding Machines
Prevents gravity axis drop, ensures emergency stop during power fail

Visit Now

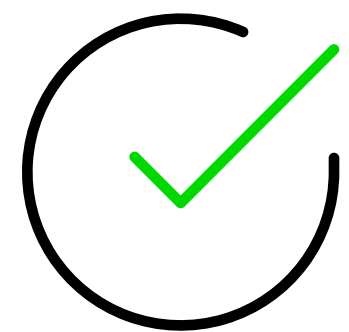

How **ACCUSTOP** Works

Senses 3-phase power input, cuts off brake-voltage in advance during power failure. Prevents gravity axis drop of CNC and Grinding machines.

Key Advantages

- Sensing of power failure & phase imbalance
- Auto emergency creation during failure
- Max. 5 contacts supported
- Compact design, easy wiring
- Mounts inside electrical panel
- Manual emergency interface
- No changes in CNC systems & parameters
- Customization as per your CNC machine
